

CPV RetailTM

CPV Maple Hill Solar in Portage, PA

Helping you navigate your energy transition

CPV Retail, an affiliate of Competitive Power Ventures (CPV), is a provider of low carbon, reliable, and cost-effective electricity solutions.

As part of one of North America's most innovative power generation development and asset management companies, CPV Retail leverages decades of expertise to help you navigate your energy transition.

Since launching in 2022, CPV Retail has grown to be a trusted partner serving customers across government entities, healthcare facilities, retail businesses, commercial real estate, universities, manufacturing operations, and more.

ENERGY SOLUTIONS DESIGNED TO POWER YOUR CLIENTS' FUTURE.

CPV Retail provides customized energy solutions to businesses across several states, in PJM and the NYISO, including Delaware, Illinois, Maryland, New Jersey, New York, Ohio, Pennsylvania, Washington, D.C., and Virginia.

What We Offer

- **Competitive Pricing** powered by us, delivered by you.
- **Tailored Solutions** designed to meet business needs —offering flexibility, predictability, and opportunities to capitalize on market conditions.
- **Sustainable Solutions** customized with options to meet environmental goals including Green-e® RECs*, SRECs, and more.

Key Benefits of Choosing CPV Retail

Low Carbon Solutions

Access to power generated from renewable sources, including the CPV fleet.

Solution-Oriented Customer Service

With support ready to help you when you need it from dedicated professionals.

Competitive Pricing

Solutions that make low carbon energy both affordable and scalable for commercial and industrial customers.

Operational Expertise

With over 6.8 GW of natural gas, wind, and solar generation brought online since 2010, CPV's leadership in power generation and asset management will ensure your optimal energy efficiency and reliability.

Backed by a History of Success

CPV has successfully developed, sold, financed, and acquired over 17 GW of power generation since 1999.

Commitment to the Future

Support the energy transition with a trusted partner committed to sustainability and innovation with a diverse pipeline of projects to respond to future needs.

Partner with CPV Retail for the expertise, reliability, and commitment to sustainability that you can count on. Let us be your partner in delivering smarter energy solutions.

CPV Retail offers a REC-only product called "CPV Retail Renewables" as a participant in the Center for Resource Solutions Green-e® Energy program. Learn more at www.greene.org.

March 2026

Products We Offer

Fixed Rate

A Fixed Rate plan locks in a set rate for the duration of the contract. The price per kilowatt hour will remain the same, avoiding any fluctuating in electricity bills.

- ✓ Not impacted by changing market conditions
- ✓ Predictability allows for budget planning

Index

An index is similar to a variable plan in that the price per kWh can go up or down each month. It differs in that the rate changes are based on an Index, not on electricity usage.

- ✓ Opportunity to capitalize on savings when market rates trend lower
- ✓ Offers flexibility to change plan in the future

Block & Index

Block & Index combines fixed-price protection alongside variable-price flexibility, providing ability to choose usage needs while still hedging against rising prices.

- ✓ Capitalize on both fixed and variable market components to minimize exposure
- ✓ Customized solution with flexibility

Load Following Block & Index

Load Following Block & Index, a variation of the standard block index product, allows the fixed price to be applied to a percentage of usage.

- ✓ Provides additional flexibility for customers
- ✓ Not limited to a fixed, static quantity which may or may not cover the deviations of consumption due to weather or other factors

Solutions Powered by Green Energy

We are committed to helping businesses meet their energy goals and align with a more sustainable future. Any of our products can be combined with 100% green energy or adjusted to fit an organization's needs. Together, let's lead the way in environmental responsibility and sustainability.
